this look accurate you? feel free to adjust for accuracy. also any sense of when your report is due out?

'In response to concerns over the its initial testing of two monitoring wells, the E.P.A. agreed to conduct additional water sampling in the area for study. The results are slated to be released this fall and reviewed by an independent panel.

No. USGS is releasing sampling data taken this summer from a Pavillion, wyo. area monitoring well. Haven't seen their release but am told it will be just data. EPA will be releasing data soon, not sure when.

Hey Rich--

Dan Frosch with the NY Times here.

You guys releasing anything on fracking today?

For some reason this date stuck out in my mind.

When you get a sec...

Thanks,

Dan
